ANTAM Launches New Silver and Gold Collection: The Enchanting Cultural Heritage of Indonesia

Jakarta, July 27, 2023 – PT Aneka Tambang Tbk (ANTAM; IDX: ANTM; ASX: ATM), member of PT Mineral Industri Indonesia (Persero) (MIND ID) - the State-Owned Enterprise Holding of the Mining Industry, announced that the Company through the Precious Metal Processing and Refinery Business Unit introduced the latest series of thematic silver and gold products named Indonesian Heritage. For first time ANTAM produces 6 premium Silver Bar designs with a weight of 1 Toz or 31.103 grams. Meanwhile, the Gold Gift Series will be released in 4 designs with a weight of 0.5 grams. The theme 'Indonesian Heritage' was chosen by ANTAM to appreciate and honor the diversity of cultural heritage, as well as to support the uniqueness of several strategic regions in Indonesia.

ANTAM's Director of Operations and Production, Hartono, said:

"The launch of the new silver and gold product series is in line with the momentum of welcoming the Independence Day of the Republic of Indonesia by showcasing the strategic regions of Indonesia with iconic landscapes from several regions that have historical values, including the National Monument in the Silver Bar product design. While in the Gold Gift Series products, several landscapes of tourist destinations are emphasized as designs to show the beauty of Indonesia and its cultural heritage. Upon this launch, ANTAM presents differentiation, specifically through silver products aimed at responding to customer expectations and demands. ANTAM expects the Indonesian Heritage series products to support the Company's performance and sales targets. This product is also believed to be a valuable collection in the long term and timeless."

The Indonesian Heritage Silver Bar measures 42.5 mm x 25.5 mm and features 6 landmark designs of Indonesia's strategic cities namely: (1) National Monument from DKI Jakarta; (2) Barong from Bali; (3) Sura & Baya Statue from Surabaya; (4) Gedung Sate from Bandung; (5) Ampera Bridge from Palembang; and (6) Pinisi Ship to represent Makassar City.

Indonesian Heritage Silver Bars are made using modern technology at 1 Toz or 31.103 grams. The silver products use security features in the form of microtext written "2023" on the pattern, rainbow effect, latent image, and QR code. Gift Series gold products are also equipped with microtext, invisible ink, and QR code.

Microtext is a tiny special code on the silver/gold surface that is produced with a high level of accuracy, which is difficult to counterfeit. The rainbow effect will give a special color effect on the surface of the silver bar. The latent image is a hidden image that is only visible when the silver bar is viewed from a certain angle. QR code will make it simpler for customers to obtain information about other Precious Metal products. Invisible ink is a special ink that will only be visible under UV light.
