ANTAM's President Director, Tato Miraza said:

**"We consistently implement good mining practises throughout our operational activities, from exploration, mining, processing and marketing. As well, we are committed to actively participate in improving the welfare of the surrounding community and preserving the environment through a series of well-planned CSR and environmental management programs."**

## Press Release

The Social Business Innovation Award is a new award given based on a series of research, surveys, and analysis. The study will rank companies based on successful implementation of sustainable business activities through innovative Corporate Social Responsibility (CSR) programs which create benefits to the society and the environment.

The Green CEO Award is given to CEO who leads his or her company as a sustainable company based on business, natural environment and social environment aspects. The event is held annually since 2010 by Warta Ekonomi Magazine. In 2012, ANTAM also wins the Green CEO Award.
