

GREEN PROCUREMENT POLICY

As part of PT ANTAM Tbk. (ANTAM)'s commitment to realizing sustainability in all its business lines, this Green Procurement Policy is prepared as a reference in designing and implementing green procurement policies throughout the company's operational activities. This document applies to all operational units with Production Operation IUP or Special Production Operation IUP status, which are required to have a green procurement policy following applicable laws and regulations. The development of this policy ensures that all aspects of procurement within ANTAM align with sustainability principles.

1. Commitment to prioritize using products with environmentally friendly certifications, such as recyclable materials, energy-efficient products, and materials derived from renewable and sustainable resources.
2. Commitment to reduce negative environmental impacts at all stages of the procurement process.
3. Selection of suppliers and vendors committed to sustainable business practices, have environmental certifications, and implement policies and practices supporting social and environmental responsibility.
4. Commitment to raising awareness throughout the supply chain on the importance of green procurement. We will conduct training, workshops, and educational programs for employees and suppliers to encourage adopting best practices in green procurement.
5. Commitment to adopt a policy of transparency in the green procurement process by providing information related to the environmental impact of the products used. We will also periodically report progress and achievements in implementing green procurement policies.
6. Commitment to ensure that procurement activities at ANTAM comply with national and international regulations relating to the environment and support globally recognized environmental initiatives such as the Sustainable Development Goals (SDGs).
7. Commitment to continue to innovate to develop more environmentally friendly procurement practices and drive continuous improvement in supply chain management.

This policy is documented, implemented, regularly reviewed, and communicated to all employees, partners, customers, business-related stakeholders, and relevant communities.
