

Press Release

**ANTAM INITIATES
500,000 TREES
PLANTING PROGRAM AT
ITS BUSINESS UNITS**

For Immediate Release

Jakarta, November 28 2008 – PT Antam Tbk (ASX - ATM; IDX - ANTM), today launches an initiative to plant 500,000 trees throughout its business units. During the program, Antam will plant various trees, including mangrove, local vegetation, fruits, and other varieties until the end of March 2009.

The initiative program is held in conjunction with today's celebration of Indonesia's Trees Planting Day. Trees planting is also an integral part of Antam's CSR activities to rehabilitate its exploited mine sites as well as to preserve the surrounding environment. As well, by planting various fruits, Antam also intends to support government's initiative to prevent nutritional deficiency.

During the launching ceremony at Taman Hutan Hambalang, Sentul, West Java, Antam's President Director, Alwin Syah Loebis said,

"The launch of this program is not intended solely to preserve the environment. The program also involves planting fruits which may prevent nutritional deficiency within the surrounding community. We also plant varieties that are beneficial for the local timber industry as well as those that start to become scarce."

Antam will work closely with other State Owned Enterprises, universities, Forestry Department, Agricultural Department, its employees and the surrounding community to implement the program. The ini-

tiative is also held simultaneously at Antam's mine sites of Pomalaa (Southeast Sulawesi), Pongkor (West Java), Kijang (Riau Islands), Buli and Gebe Islands (North Maluku), and Cikotok (West Java).
